# Sustainable Sourcing in Food and Fibre

Gain the specialist skills needed to implement sustainable sourcing along company supply chains.

Concerns over the long-term environmental impact of supply chain management processes mean companies must take steps to improve how their products are sourced, produced, and delivered.

Co-designed with SAI Platform, this Melbourne MicroCert equips learners with the fundamental knowledge to apply sustainable sourcing along supply chains in an environment where there is a growing demand for greater social accountability.

Guided by industry experts from the University of Melbourne, you'll examine how leading international companies incorporate sustainable sourcing processes into their supply chains.

Access world-class resources from leading food and fibre companies to analyse international trends and explore the key drivers of sustainable sourcing.

You'll have the opportunity to develop and present a proposal of sustainable sourcing policies and practices you can apply to your organisation.
